

Making Friends with Our Mind

A Meditation Daylong for Beginners

Mindfulness is the energy of being aware and awake to the present moment. It is the continuous practice of touching life deeply in every moment of daily life. To be mindful is to be truly alive, present and at one with those around you and with what you are doing. Sitting meditation is very healing for both the mind and the body. We realize we can just be with whatever is within us – our pain, anger, and irritation, or our joy, love, and peace. We are with whatever is there without being carried away by it. In this special daylong for beginners we introduce mindfulness meditation through sitting and walking practice. The day will include meditation instructions, group sharing, sacred music and talks on the theme of the day.
