

Healing for the Healers

A daylong retreat with Spring Washam & Ali Kane

This daylong is designed for those in the healing arts and caregiving professions. Healers and caregivers spend most of their time taking care of others. This is a beautiful service of compassion and generosity. It is also essential for their health and well-being that healers heal themselves. When healers are well, not only are they more nourished and sustained, they are also more effectively able to assist others. In this daylong we will focus on meditation practices and interactive exercises to support healers in their own healing.
